STATEMENT OF Purpose

In accordance with the requirements for tax exemptions, hospital organizations must meet the requirements imposed by the Internal Revenue Services as described in Section 501(r)(3) by conducting a Community Health Needs Assessment (CHNA) every three years. This CHNA will be included as part of their corporate tax filings with the Internal Revenue Service. Iroquois Memorial Hospital (IMH) is dedicated to providing the best quality health care services for the communities it serves. By assessing community health needs through a review of the available health data, collective participants perceptions of health needs of the area, local officials and community leaders and representatives of the many groups served by the hospital, IMH and its health care partners were able to identify and address the area's most pressing health care needs.

EXECUTIVE Summary

Iroquois Memorial Hospital (IMH) sees many opportunities to provide more healthcare services that are needed in our community. We know that travel and local accessibility have an effect on the health of our citizens, so we are growing our system to address these needs.

Although we face many challenges as a rural, independent hospital, our 2023 licensure as a Critical Access Hospital (CAH) has allowed for appropriate funding of Medicaid and Medicare services. Coupled with our proactive approach to meeting challenges for rural healthcare we have a strategy of growth in our communities, of our specialties, and for our access to care. We will continue to provide more services that are closer to where our patients live knowing this patient focus improves the overall health of our community.

Community involvement from our local board, administration and leaders has helped us research the needs of our community. Our priorities reflect our needs as highlighted in the most recent IPLAN. We will strive to be the best in class in three primary areas:

- Emergency Services
- Specialty Services Expansion
- Community Wellness

These priorities represent increased access to more critical services that keep the patient closer to their home.

IMH will be an outstanding organization by exceeding community and board expectations through empowered people, guided by our shared values. This requires:

- A consistent CUSTOMER FOCUS for our organization.
- A PASSION to provide better patient outcomes and superior customer experiences in our community.
- An EMPOWERED ORGANIZATION which is both motivated and supported to satisfy customers to the fullest extent of our capabilities.
- A SET OF SHARED VALUES which guides all of our decisions and actions represented in our logo and lived out in the lives of our associates.

SCOPE OF Assessment

In 2025, Iroquois Memorial Hospital (IMH) undertook a comprehensive Community Health Needs Assessment (CHNA), a critical initiative designed to deeply understand and address the healthcare and well-being requirements of its service area. This significant endeavor was guided by the VP of Patient Health, ensuring a patient-centric approach from its inception.

The CHNA was not a solitary undertaking; rather, it was a collaborative effort involving various IMH subcommittees, which brought diverse perspectives and expertise to the table. Crucially, the process also benefited from the active participation and invaluable support of a broad spectrum of community members and local groups. This inclusive approach ensured that the assessment truly reflected the experiences and concerns of the population IMH serves.

Through a series of discussions, surveys, and data analyses, the CHNA process empowered Iroquois Memorial and its community participants to collectively assess the needs of the community on multiple, interconnected levels. This holistic examination went far beyond traditional health metrics, delving into a wide array of factors that significantly influence overall community well-being. Specifically, the assessment carefully considered:

- Geographical Needs: Understanding the distribution of healthcare services, accessibility challenges, and transportation barriers within the service area.
- Economic Needs: Investigating socio-economic determinants of health, such as employment rates, poverty levels, and access to affordable resources.
- Social Needs: Exploring social determinants like education, housing, social support networks, and community safety.
- Spiritual Needs: Recognizing the role of spiritual well-being and community support systems in promoting health.
- Health Needs: A review of prevalent health conditions, access to primary and specialized care, preventative health measures, and public health concerns.

By thoroughly analyzing these multifaceted dimensions, the CHNA provided Iroquois Memorial with an in-depth understanding of the community's strengths, challenges, and opportunities. This comprehensive insight was instrumental in enabling IMH to strategically plan a targeted course of action, developing initiatives and programs designed to effectively and compassionately serve the unique and evolving needs of its entire service area. The CHNA thus serves as a foundational document for IMH's future strategic planning, ensuring its services remain relevant, impactful, and truly beneficial to the community it pledges to serve.

METHODOLOGY AND Gaps Discussion

In 2025, Iroquois Memorial Hospital conducted a community health needs assessment (CHNA). After reviewing primary data that was collected, it was determined to proceed with three focused groups as well as the participation in the Illinois Project for Local Assessment of Needs (IPLAN) led by the Iroquois County Public Health Dept. Their plan is a result of a comprehensive, community-based public health needs assessment, including reviews of relevant data, collective perceptions of the community participants, and dialogue about the overall health of Iroquois County. The development of the IPLAN comprised of a multitude of representatives from community leaders, health professionals, faith leaders, business leaders, local officials, and the local school.

Quantitative information from the U.S. Census Bureau was collected at the zip code level providing demographic and economic information and variables for multiple years of past and present data allowing for identification of trends over time. Additional data was collected from the American Community Survey, Iroquois Health Department IPlan, and 2025 County Health Rankings both Illinois and Indiana. Note: This indicator is compared to the lowest state average.

Secondary data from state, federal and professional sources, which are cited in the text, were reviewed and compared to the primary data gathered. Identified needs were prioritized through that process and presented to hospital administration for review.

GEOGRAPHIC ASSESSMENT

Area Defined

The IMH community was identified through a facilitated meeting with senior staff as a geographic area determined to be the current primary and secondary hospital service areas, which includes all or portions of the zip code service areas surrounding Watseka and reaching into Iroquois, Ford, and Kankakee counties in Illinois and Benton and Newton counties in Indiana. This geographic area's definition of community is well-suited to IMH, providing basic, primary care through inpatient care, ancillary services, clinics and specialty clinics to residents of a rural area. Tertiary Care Hospitals in Champaign, Kankakee, and other locations receive patients from the service area.

EVALUATION OF Prior Implementation Strategy

The following three initiatives were met with many challenges. As we navigated through numerous barriers, IMH—supported by its dedicated staff and the broader community—has achieved meaningful growth in the delivery of healthcare services across our rural service areas. These achievements reflect our continued commitment to improving access, expanding services, and enhancing the overall health and well-being of the communities we serve.

PRIORITY 1

Clinic Growth

IMH continues to advance its mission of improving access to quality healthcare for rural populations. Over the past three years, the organization has expanded both its clinical capacity and scope of services to better meet patient needs, with a focus on primary care, behavioral health, and integrated chronic disease management.

St. Anne Clinic Expansion

St. Anne Clinic, the newest addition to IMH's network, opened in November 2022 and is now under the leadership of Nurse Practitioner Diana Kaufman. The clinic has experienced steady growth and increasing patient demand. In response, operations have expanded to include an additional day of service, improving access for residents of St. Anne and surrounding communities.

Kentland Clinic Growth

The Kentland Clinic continues to thrive, supported by a team of one MD, one NP, and one PA. The staff actively engages in community outreach, educational events, and local partnerships, strengthening visibility, trust, and patient relationships while promoting preventive care and wellness programs. Through these relationships, IMH clinics have established themselves as community anchors,

providing not only healthcare but also education, prevention, and support services that address the broader determinants of health in rural populations.

Accountable Care Organization (ACO) and Chronic Care Management

All IMH clinics actively participate in an Accountable Care Organization (ACO) framework designed to improve care coordination, enhance quality, and reduce healthcare costs. The ACO model emphasizes:

- Avoiding duplication of tests and services
- Reducing medical errors
- Promoting collaboration among providers and care teams

In addition, IMH participates in Chronic Care Management (CCM) initiatives. CCM promotes a proactive, team-based approach to managing both acute and chronic conditions—such as diabetes, hypertension, and COPD—by emphasizing prevention, integrated care, and post-hospital recovery.

These programs have resulted in improved patient outcomes and a reduction in hospital readmissions, demonstrating IMH's commitment to long-term community health improvement.

A dedicated ACO Nurse provides leadership and oversight to ensure that all IMH clinics meet their quality measurements and assessment goals, maintaining high standards of patient-centered care.

PRIORITY 2

Medication Assisted Treatment Program

Over the past two years, IMH has prioritized the expansion of behavioral health and addiction treatment services to meet the growing mental health and substance use needs of the community.

Behavioral Health Integration

Behavioral health services were introduced two years ago, enabling patients to receive counseling and mental health support within the primary care setting. This integration has improved early identification and treatment, reduced barriers to care, and increased patient engagement.

Suboxone Training for Providers

All new IMH providers are trained and certified in Suboxone prescribing, ensuring the availability of medication-assisted treatment (MAT) for patients struggling with opioid use disorder. This initiative strengthens continuity of care and supports recovery within the patient's established medical home.

Pain Management Services

IMH launched a Pain Clinic within its Specialty Clinic to assist patients with chronic pain while promoting safe, effective, and non-opioid treatment options. The clinic's mission is to help patients manage pain through multidisciplinary approaches, education, and coordinated care, ultimately reducing reliance on opioid medications.

This planned growth aligns with IMH's broader goal to expand accessibility, strengthen preventive care, and promote the long-term health of the communities it serves.

PRIORITY 3

Surgical Specialty Expansion

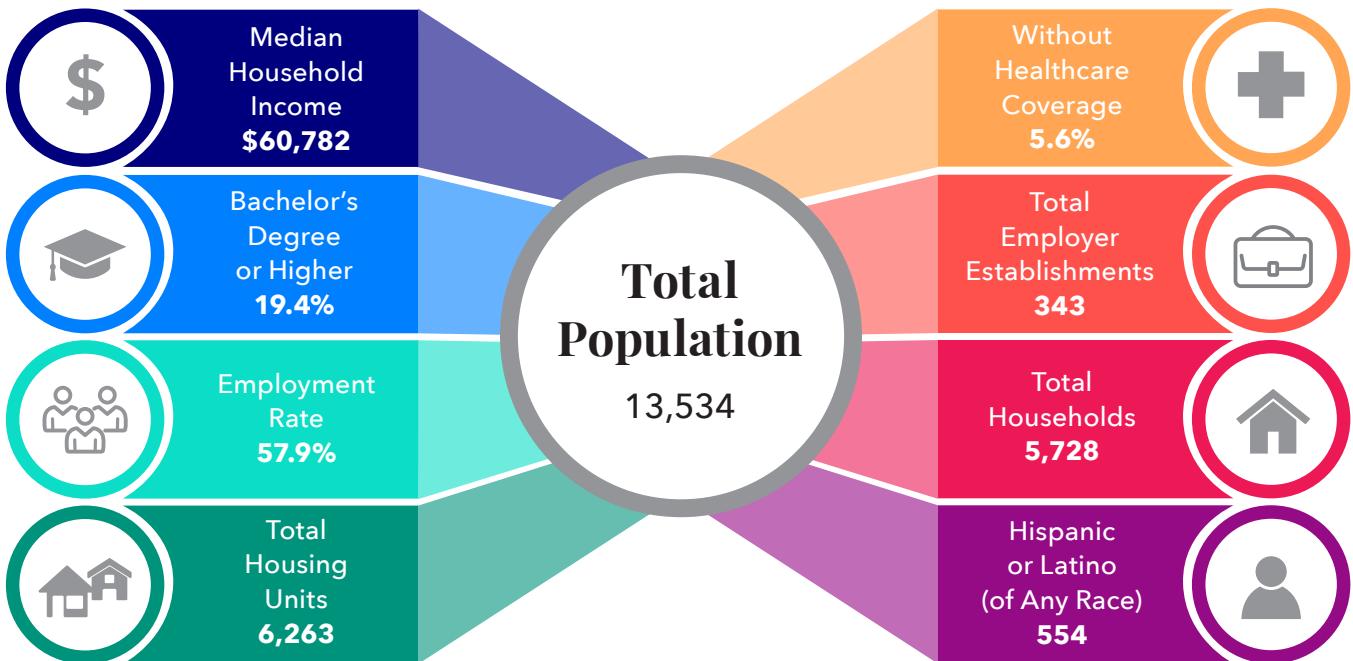

In the past three years, our organization has strategically directed its efforts and allocated substantial resources towards the expansion of our surgical department, specifically by integrating additional surgical specialties into our facility. This initiative, while crucial for enhancing the scope of healthcare services available to our community, has been met with considerable challenges.

A primary obstacle has been the complex and often arduous task of enticing and successfully recruiting highly skilled surgeons to a rural community setting. Rural areas often present unique disadvantages in this regard, including perceived limitations in professional development opportunities, access to advanced medical technology, and a smaller pool of support staff. Overcoming these hurdles has required a multi-faceted approach, involving not only competitive compensation and benefits packages but also a concerted effort to highlight the unique advantages and quality of life offered by our rural community.

Even with all of these challenges, our commitment to expanding healthcare services remained steadfast. We are proud to announce the successful recruitment and integration of several new medical professionals into our team. We welcomed a highly skilled Gynecologist, a comprehensive Cardiologist Group, and an expert Orthopedic Surgeon. These additions significantly enhance our capacity to provide specialized care to our community, addressing critical needs in women's health, cardiovascular care, and musculoskeletal services. This expansion reflects our dedication to improving patient outcomes and offering a broader range of in-house medical expertise.

Ability to pay for basic needs (i.e. food, clothing, etc)

Within the past 12 months, has the food you bought not lasted and you didn't have money to get more?

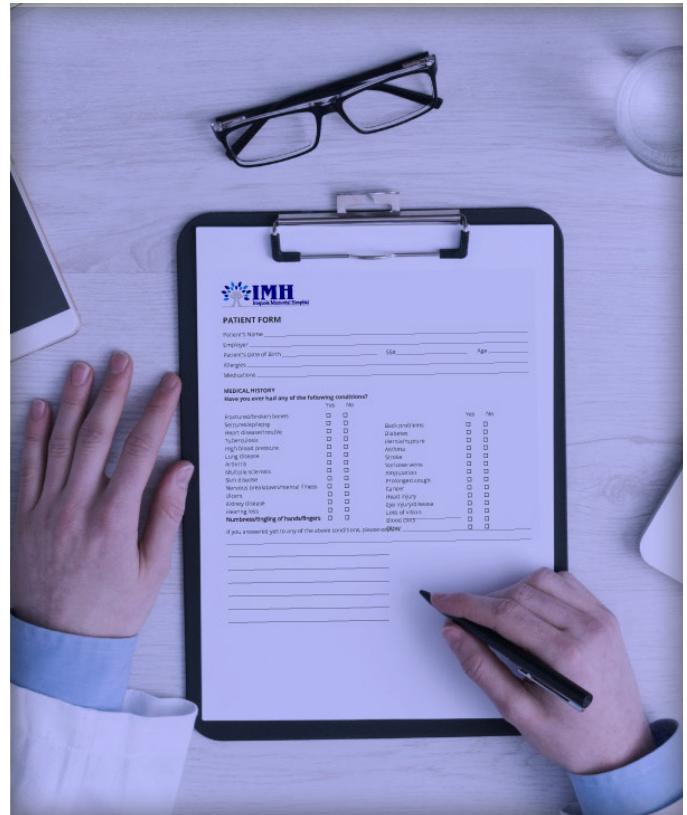

Within the past 12 months, has the electric, gas, oil, or water company threatened to shut off services in your home?

NEED IDENTIFICATION AND Prioritization

Reconciliation of Primary Source Information with Secondary Data The facilitated primary information gathering process resulted in the discovery of issues subsequently prioritized during discussion by participants and repetition among groups to a list of concerns largely common to the overarching categories of mental health services, including prevention of substance abuse and access to mental health are for the uninsured and underinsured, diabetes, and obesity. The areas chosen were consistent with the needs of the need identified from the secondary information collected and observed.

SYNTHESIZED Secondary Data

Focus Group #1 - Iroquois Memorial Board of Directors

Focus Group #2 - Executive Team

Focus Group #3 - IMH Administrative Team

These groups discussed a wide variety of health needs and health-related concerns in several general categories, including:

- Specialty Services
- Community Wellness
- Mental Health Issues
- Women's Health

With a focus on these specialized categories:

- Ambulance
- Cancer
- Cardiology
- Dermatology
- Nephrology
- Pediatrics
- Access to Care
- Elderly Care
- Underserved
- Obesity
- Transportation
- Drug and Alcohol Programs
- Med Spa

SUMMARY OF FINDINGS AND Recommendations

The items set forth below are those which found consistent identification and, ultimately, prioritization in the primary information gathering process and which are supported by the secondary information related to demographics and health status.

IMPLEMENTATION Strategy

The Identification of the Needs of the Community that we serve and Prioritization Findings and Recommendations have been used to create an action plan to achieve success in health and wellness.

PRIORITY 1

Specialty Service Expansion

IMH's focus is to better serve families in our community and grow our specialty services. The goal is to evolve into a comprehensive "one-stop shop" for patients of all ages-offering primary care, pediatrics, behavioral health, gynecology, women's health, cardiology, and other specialty services under one coordinated system. This continued growth will not only strengthen access to care, but also enhance continuity and patient satisfaction, aligning with IMH's broader mission of delivering compassionate, community-based healthcare.

PRIORITY 2

Emergency Services

IMH recognizes the disparities in access to Emergency Services in rural areas and understands the importance of mitigating the effects of geographical and limited resource challenges for the communities served. With initiatives in recruitment efforts in response to ongoing industry and rural staffing shortages, the role of Emergency Medical Technicians and Paramedics will continue to evolve within the Emergency Department of the hospital. Efforts will be focused on dedicated urgent hospital-to-hospital ambulance transports for higher level of care after providing immediate medical intervention and stabilization to ensure continuity from the most appropriate receiving facility according to the needs of the individual patient. Strategic Planning priorities include supporting local 911 and EMS services with a hospital-based ambulance service staffed with qualified personnel 24/7.

PRIORITY 3

Community Wellness

IMH is committed to increasing wellness care access in our rural communities by encompassing an integrated approach that extends beyond acute medical services to address long-term health outcomes and quality of life. Given the heightened prevalence of chronic conditions such as obesity and the barriers many rural residents face in accessing fitness opportunities and nutritious foods, IMH is planning to increasingly consider or adopt programs that combine clinical care with preventive and lifestyle-focused interventions. These may include structured fitness and weight management programs, nutrition counseling, and initiatives aimed at improving access to high-quality foods. In addition, complementary services such as massage therapy, spa treatments, and elective procedures like Botox are other options to consider that can be incorporated to promote overall well-being, stress reduction, and self-confidence. By aligning traditional health services with wellness-oriented care, IMH is striving to develop a more comprehensive model that addresses both medical needs and the broader determinants of health within our communities.

RESOURCE

Inventory

IMH offers a wide range of services and care to portions of five counties in Illinois and Indiana. The hospital provides general medical and surgical care for inpatient, outpatient, IMH Satellite Clinic patients, emergency room patients, and participates in the Medicare and Medicaid programs.

SERVICES INCLUDE:

Community Resources

FOOD INSECURITY

- Within the past 12 months, has the food you bought not lasted and you didn't have money to get more?
 - Many people and families struggle with food insecurity. Since so many struggle with food insecurity there are many resources available.
- Below is a list of programs that can help depending on where you live:
 - Backpack Program
 - ◊ This is a program that assists families with food insecurity during weekends and school breaks. Ask your child's school if they offer this program.
 - Food banks and food pantries
- Food banks have a supply of food that they give out through organizations. Food pantries are usually located in the local churches.
- **Illinois Food Pantries**
 - First United Methodist Church Food Pantry 301 S. 4th St, Watseka, IL 60970 (815) 432-0122
 - The Bread Basket Food Pantry 121 W. Walnut St, Watseka, IL 60970 (815) 450-1461
 - Martinton Community Food Pantry 213 Thomas St, Martinton, IL 60951
 - Sheldon Area Food Pantry 107 N 4th St, Sheldon, IL
 - G.O.D.'s Food Pantry 116 N Thomas St, Gilman, IL 60938
 - Clifton Community Food Basket 100 S Maple St, Clifton, IL 60927
- **Indiana Food Pantries**
 - The Pantry at Covenant Federated Christian 612 6th St, Kentland, IN 47951 (219) 474-5813
 - Faith Harvest Food Pantry 223 E State St, Morocco, IN 47963 (219) 285-2691
 - Remington Food Pantry 1 N. Ohio Street Remington, IN 47977 219-274-6426
 - Lafayette Urban Ministry Protein Food Pantry 6th Street between Ferry & North Streets, Lafayette, IN
 - Lafayette Urban Ministry 333 Meridian Street, West Lafayette, IN
 - Open Arms Food Pantry 209 US 52 West Fowler IN 47944
- Iroquois Memorial Hospital Community Vegetable Garden (Seasonal)
 - Iroquois Memorial Hospital has a vegetable stand during the spring and summer for anyone who struggles with food insecurity and needs healthy options. This is located in front of 850 S. 4th St. Watseka, IL 60970.
- National School Lunch Program
 - Check with your child's school if they offer reduced price or free lunches to the children.
- School Breakfast Program
 - Check with your child's school if they offer reduced price or free breakfasts to the children.
- SNAP (Supplemental Nutrition Assistance Program)
 - This program provides electronic benefits to low-income people and families to assist them with buying food.
 - Illinois - (800) 843-6154
 - Indiana - (800) 403-0864

- Soup kitchens
 - They provide reduced price or free meals to those in need. These are usually done by churches or other organizations.
- Summer Food Service Program
 - This program provides meals for children during their summer break. Check with your child's school to see if they offer this program.
- WIC (Special Supplemental Nutrition Program for Women, Infants, and Children)
 - This program provides services, such as education on nutrition, counseling and support, breastfeeding support, access to nutritious foods, health screenings, and referrals to other services for low-income pregnant women/mothers, infants, and children up to the age of 5. The services are usually offered through hospitals, local health departments, and schools.
 - Illinois WIC

Ford County
711 E Pells St Paxton, IL 60957
(217) 579-1087
 - Kankakee County
 - ◊ The Kankakee County Health Department WIC program offers both walk-in and appointment options for one-on-one sessions, online modules that can be completed at home, and interactive group classes.
 - ◊ Call the Kankakee County Health Department at (815) 802-9400 to make a WIC appointment.
2390 W Station St, Kankakee, Illinois 60901
 - Vermilion County

200 South College Street, Suite A Danville, IL 61832
(217) 431-2662
 - Indiana WIC
 - ◊ Benton County
105 South Howard Oxford, IN 47971
(765) 385-0623
 - ◊ Jasper County
206 W. Washington St. Rensselaer, IN 47978-2625
(219) 866-8662
 - ◊ Newton County
Newton County Government Center 4117 S 240 W Morocco, IN 47963
219-285-6080

HOUSING INSTABILITY

- Within the past 12 months, have you ever stayed: outside, in a car, in a tent, in an overnight shelter, or temporarily in someone's home? Are you worried about losing your housing?
 - Housing instability comes with a lot of challenges, such as difficulty paying rent, having to move often, living in unsafe conditions (places with health and safety risks like mold, poor heating/cooling systems, vermin, water leaks, etc.) due to needing cheaper housing, or the majority of your income going to housing. All of these factors can have a negative impact on your health and your access to healthcare.

- Below is a list of local resources for homelessness:
- **Illinois Resources**
 - Emergency Red Cross (217) 431-5600
 - Public Safety Building Danville - 1 night voucher
 - Emergency Services/Homelessness Prevention (815) 933-7791 (Catholic Charities)
 - ◊ Gift of God Street Church Homeless Shelter-Soup Kitchen (815) 507-6603
 - 660 N. 5th Ave. Kankakee, IL 60901
 - C-U at Home (217) 819-4569
 - 309 S. Neil St. Champaign, IL 61820
 - Hours: 9AM-5PM Monday through Friday
 - Salvation Army Shelter (815) 933-8421
 - 148 N. Harrison Ave. Kankakee, IL 60901
 - Hours: 9AM-5PM Monday through Thursday, 9AM-1PM on Friday
 - United Way of Kankakee and Iroquois Counties (815) 932-7476
 - 200 E Court Street Suite 500 Kankakee, IL 60901
 - Their office is located in the Executive Centre, the same building as Kankakee Public Library
 - Life Church - Gilman (815) 265-4888 • Sometimes works with Trinity Church in Watseka.
 - Living Hope Church - Watseka (815) 432-4211 • Sometimes works with Trinity Church in Watseka.
 - Trinity Church - Watseka (815) 432-4070
- **Indiana Resources**
 - American Red Cross - Indiana (765) 742-6975 • 615 N 18th St, Lafayette, IN 47904
 - Family Promise of Greater Lafayette (765) 838-3651 • 2010 Elmwood Avenue Lafayette IN 47904
 - ◊ Family Promise of Greater Lafayette, Inc. is a homeless shelter for families with children under 18 years of age.
 - ◊ Families must be residents of Tippecanoe or the surrounding counties and must pass a criminal background check.
 - ◊ The program has the capacity for up to five families at one time and a family can stay for no more than 45 days.
 - ◊ Adults are given assistance with job searching, career building, and case management to help obtain stable housing.
 - Fuller Center for Housing Jasper County (219) 225-2539
 - Indiana Inside Claussen Equipment, 1531 N McKinley Ave, Rensselaer, IN 47978
 - Lafayette Urban Ministry (765) 423-2691 • 420 N 4th Street, Lafayette IN 47901-2213
 - Salvation Army-Kentland (219) 474-6225
 - Trinity United Methodist Church 302 N Second Street Kentland, IN 47951

TRANSPORTATION NEEDS

- Do you have difficulties with transportation?
 - Transportation difficulties have a direct impact on our access to:
 - ◊ Health care services
 - Not having reliable transportation can cause you to miss or delay your healthcare appointments, which can ultimately lead to poorer health outcomes overall.
 - ◊ Education
 - Lack of transportation can also affect your education causing you to be late or to miss your classes, which can cause multiple negative outcomes, such as inability to secure a job due to not having the required education.
 - ◊ Food
 - Not having transportation can cause problems with being able to get food and it can affect your access to healthier foods, which can also lead to poorer health outcomes overall.
 - ◊ Jobs
 - Transportation plays a major role in being able to have or hold a job, which dramatically affects household income.
 - ◊ Social commitments
 - Lack of transportation can affect social arrangements, such as visiting with family and friends. Missing these social events can cause a feeling of isolation leading to poor mental/physical health outcomes.
- Below is a list of local resources for transportation:
 - **Illinois Resources**
 - ◊ Illinois Department on Aging Benefit Access Program
 - Offers two benefits for seniors and persons with disabilities
 - Seniors Ride Free Transit Benefit
 - Persons with Disabilities Ride Free Transit Benefit
 - Secretary of State License Plate Discount
 - For information or help with applying:
 - Visit a local office of the Senior Health Assistance Program or Area Agency on Aging.
 - Call toll-free: 1-800-252-8966. For deaf and speech-impaired communication over the telephone, dial Illinois Relay at 711. (Have your social security number ready when you call.)
 - E-mail: Aging.ILSenior@illinois.gov
 - ◊ Senior Volunteer Services by Iroquois County Illinois
 - Their senior volunteer services include Services include:
 - Transportation
 - Information and referral help
 - Home care services: chores, laundry, grocery shopping, meal preparation, personal care assistance
 - Call 815-432-5785
 - ◊ Ride United - United Way
 - Call 211 for more information.

- **Indiana Resources**
 - ◊ Benton County Transportation
 - Area IV Transit provides demand response, curb-to-curb, and advance reservation transportation service within Benton County. Door-to-door service is also available upon request for those needing reasonable assistance beyond the curb.
 - Call 48-hours in advance to reserve transportation.
 - All Medicaid clients wanting to schedule medical trips must do so by calling Verida at 1-855-325-7586, option 1.
 - For all non-Medicaid trips, please call Area IV 765-447-7683, option 2 to schedule your trip.
 - ◊ Jasper County Community Services, Inc.
 - You can reserve your ride up to 1 week in advance for a pick up and drop off location in Rensselaer by calling (219) 866-8071.
 - You can reserve your ride up to 1 week in advance for a pick up and/or drop off in DeMotte or Wheatfield by calling (219) 987-7909.
 - ◊ Newton County Community Services, Inc. - Public Transportation
 - Provides curb-to-curb transportation services to medical and non-medical appointments within 120 miles of Morocco for Newton County persons in need. Out of state trips not permitted.
 - All transportation services are based on driver availability; advance scheduling is required.
 - (219) 285-2246
 - 102 East State Street Morocco IN 47963
 - ◊ Tippecanoe County Transportation
 - Call 48-hours in advance of need of transportation.
 - Transportation provided for medical trips.
 - All Medicaid clients wanting to schedule medical trips must do so by calling Verida at 1-855-325-7586, option 1.
 - Donation based trip please call Area IV 765-447-7683, option 2 to schedule your trip.

UTILITY DIFFICULTIES

- In the past 12 months has the electric, gas, oil, or water company threatened to shut off services in your home?
 - Inability to pay utilities impacts one's health and the safety of one's living environment.
- Below is a list of local resources for utility difficulties
 - Low-Income Home Energy Assistance Program (LIHEAP)
 - ◊ This is an application that provides financial assistance for eligible families struggling to pay home heating bills.

- ◊ **Illinois**
 - For additional information call Help Illinois Families call center at 1-833-711-0374.
- ◊ **Indiana**
 - 317-232-7777
- Low-Income Household Water Assistance Program (LIHWAP)
 - ◊ This is an application that provides financial assistance for eligible families struggling to pay water and sewer bills.
 - **Illinois**
 - (833) 711-0374
 - **Indiana**
 - (800) 872-0371 (Inside Indiana Only)
 - (317) 232-7777
- Community Services Block Grant Program (CSBG)
 - ◊ They provide services such as:
 - Rental/Mortgage assistance
 - Food assistance
 - Water/Sewer Payment assistance
 - Employment Training/Placement
 - Financial Management
 - Temporary Shelter
- Each agency provides local programs and services based on the community needs. If there is a particular service that is not directly provided by your local Community Action Agency, they will refer you to one of their partners for further assistance.

Remarks

The IMH CHNA was conducted in 2025. The process followed IRS guidelines allowing for a more confident focus of effort and resources. IMH is grateful to the Board of Directors Members, its staff, community leaders, and citizens who offered their thoughtful input for the assessment. This report was shared to the Iroquois Memorial Executive Team and the Board of Health in October of 2025 for further revision, updates of changes prior to widespread publication.
